

Connecting to Wi-Fi (personal devices)

Staff and students can connect their personal devices to the “Education Wi-Fi” using their school login details to get free internet access while on campus. Instructions for most common system types can be found below.

Instructions for most common system types can be found below.

Contents

Connecting a MacOS Device	2
Connecting a Windows 11 Device	4
Connecting a Windows 10 Device	8
Connecting an iPhone or iPad Device.....	9
Connecting an Android Device.....	11

Connecting a MacOS Device

Step 1: Select **Education Wifi** from your Wi-Fi menu bar.

Step 2: Enter your **Work Email** and **Password** in the box below

The Wi-Fi network "Education Wifi" requires WPA2 enterprise credentials.

Mode: Automatic

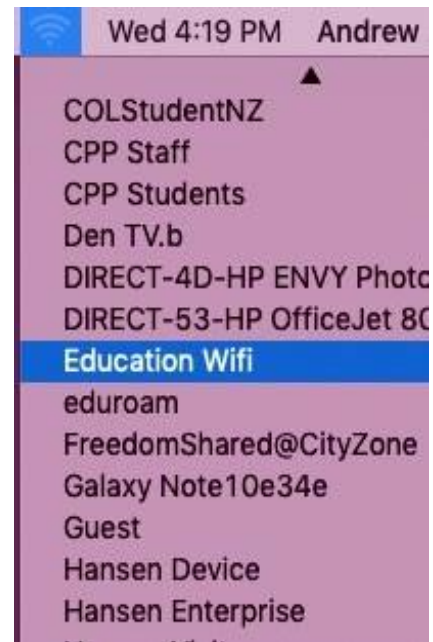

Username: <school email address>

Password: <school password>

Show password

Remember this network

Buttons: Cancel, Join

Step 3: Select **Continue** on the certificate prompt.

Verify Certificate

Authenticating to network "Education Wifi"

Before authenticating to server "corenps01.ad.up.education", you should examine the server's certificate to ensure that it is appropriate for this network.

To view the certificate, click 'Show Certificate'.

Buttons: Show Certificate, Cancel, Continue

Enter the password for **YOUR** machine. Your own name should be listed. This will save the details of the connection to the Mac keychain.

You are making changes to your Certificate Trust Settings.

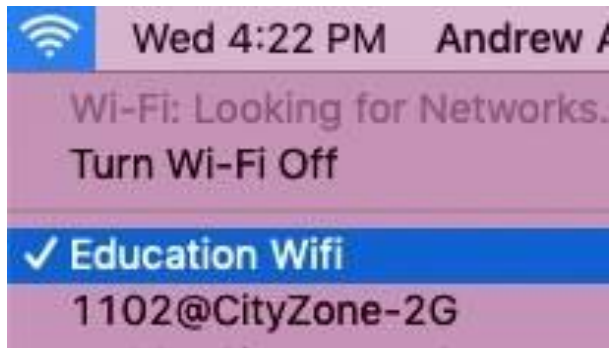

Enter your password to allow this.

Username: admin

Password: []

Buttons: Cancel, Update Settings

Step 4: Your Mac should now show connected, and you should be able to browse the internet.

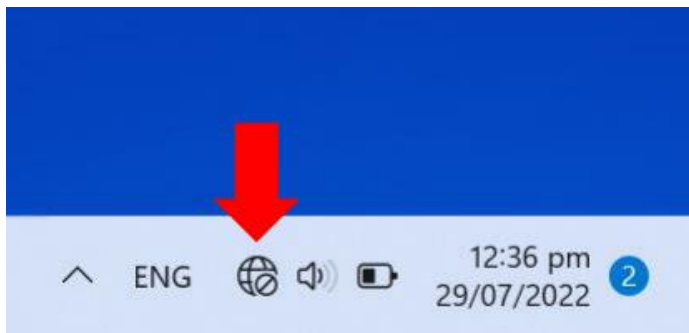

Connecting a Windows 11 Device

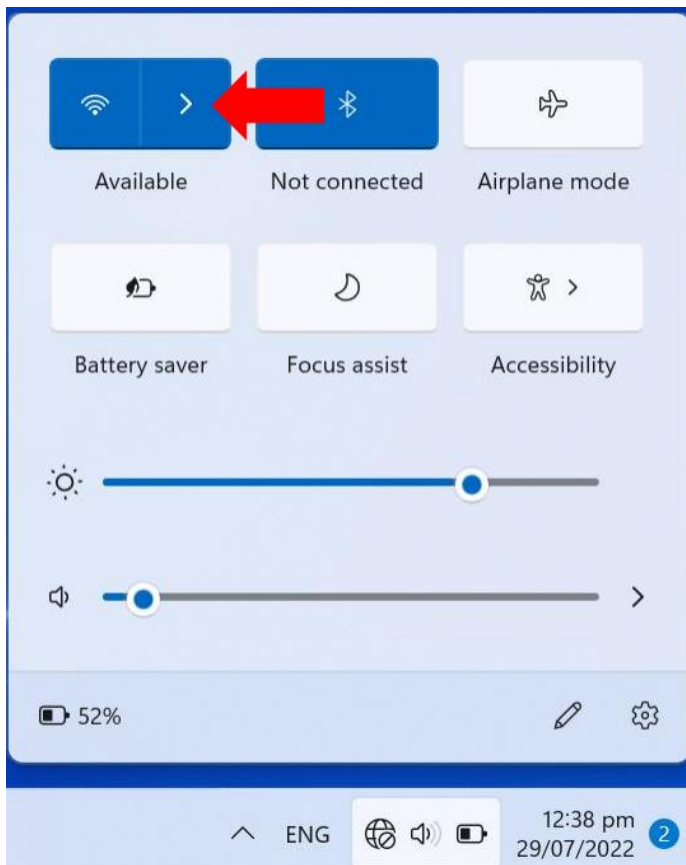

These instructions will allow you to connect your Windows 11 device to the student Wi-Fi. Step 1:

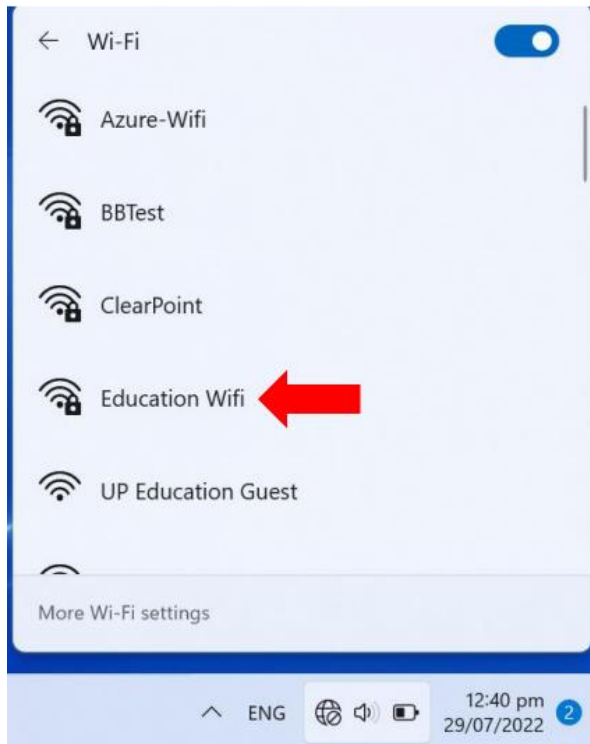

Step 1: Click on the globe icon at the bottom right of the desktop.

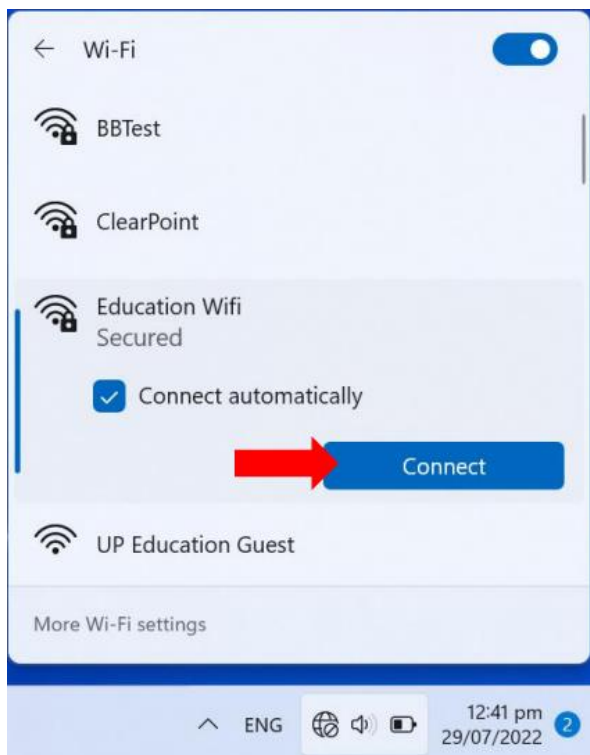

Step 2: Click on the arrow pointing right, next to the Wi-Fi symbol (above Available).

Step 3: Select **Education Wifi** from the Wi-Fi list.

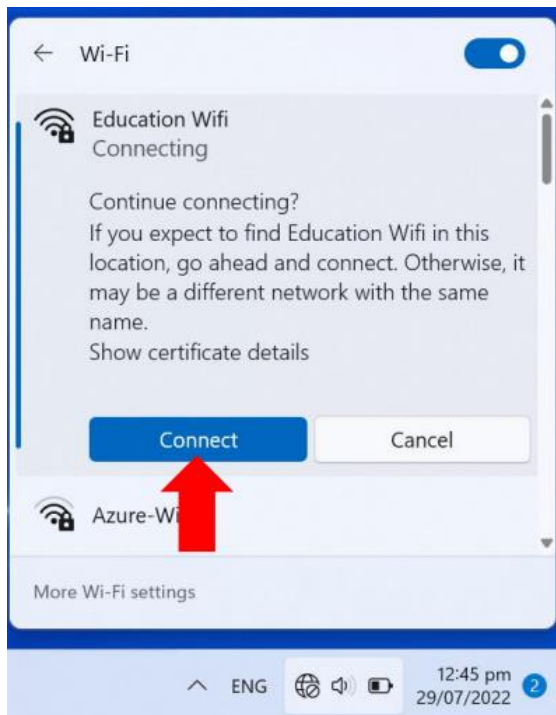

Step 4: Click **Connect**

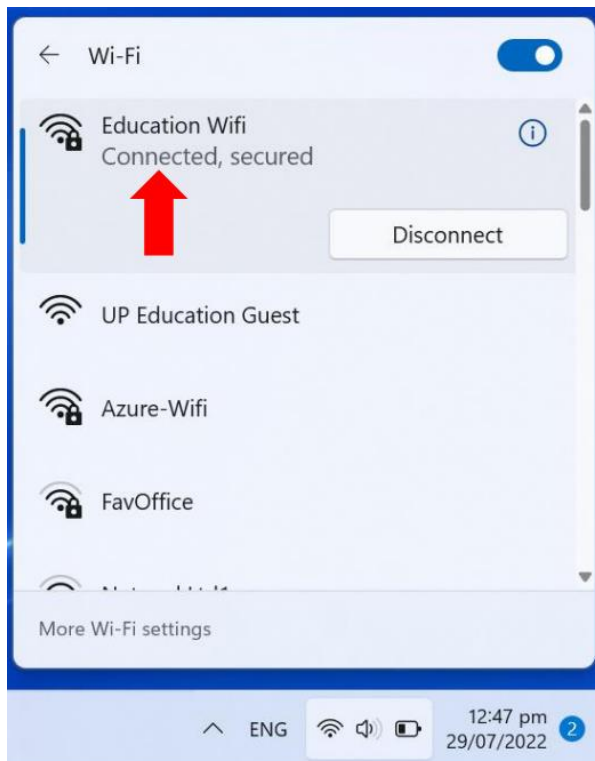

Step 5: Type in your student email address and password then press 'Enter' (or click **OK**).

Step 6: Click **Connect**.

Step 7: It should now show as connected.

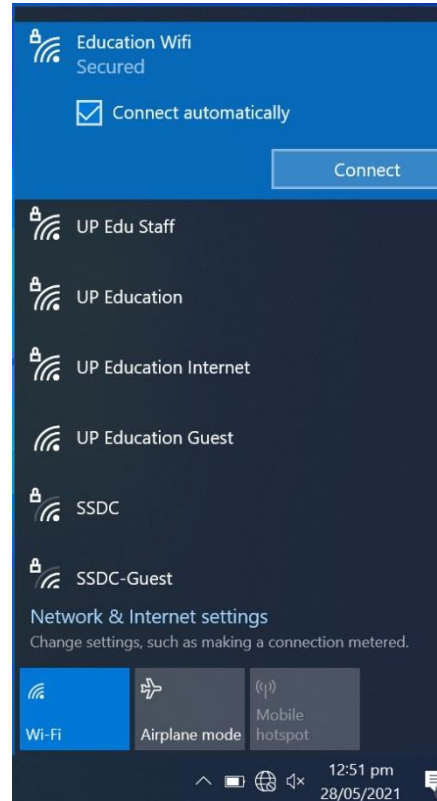

Connecting a Windows 10 Device

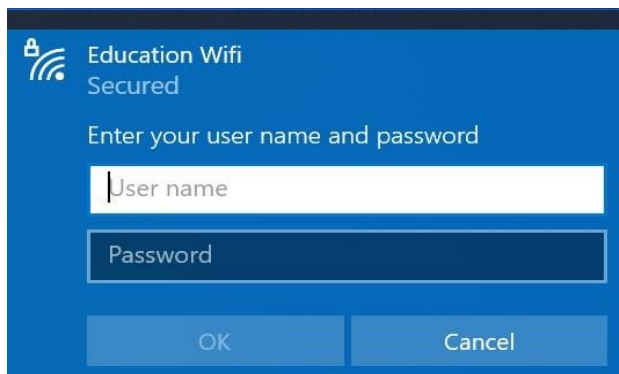

These instructions will allow you to connect your Windows laptop to the student Wi-Fi.

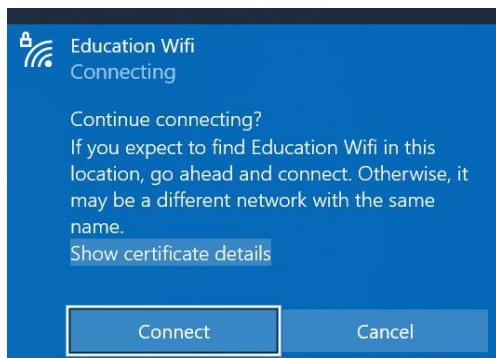

Step 1: First select **UP Education** from your Wi-Fi list and click **Connect**.

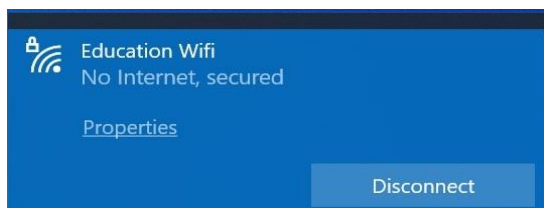

Step 2: Type in your **work email** and password

Click Connect if prompted as pictured.

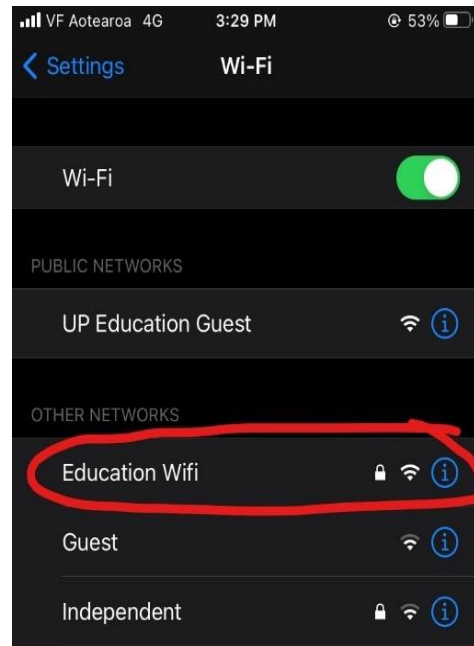

It should now show as connected.

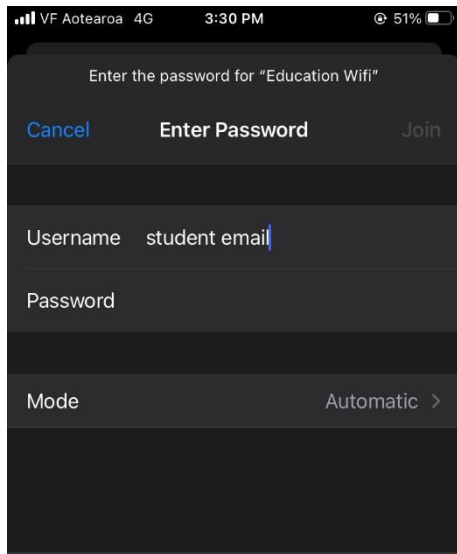

Connecting an iPhone or iPad Device

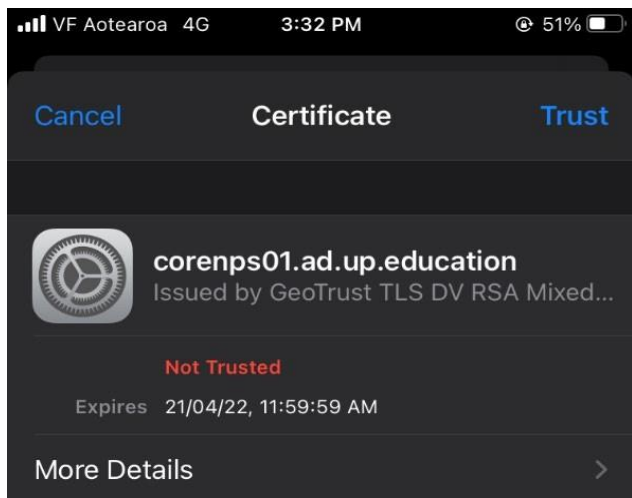

Step 1: Select Wi-Fi labelled: **Education Wifi**

Step 2: Enter your **work email address** as the username and your work account password.

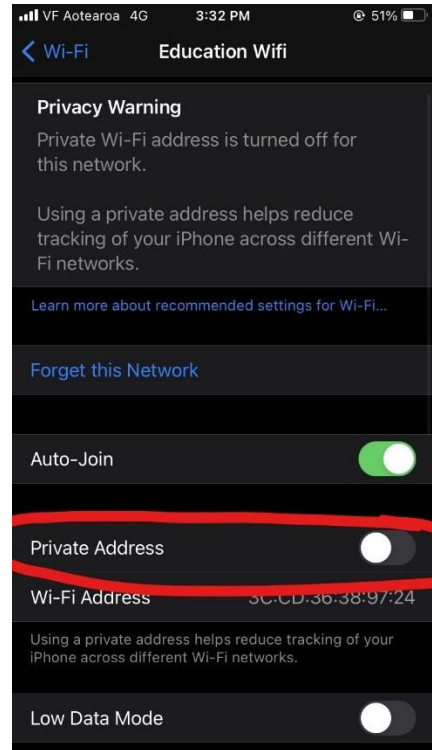

Step 3: Select **trust** when prompted for the certificate.

Step 4: Click the Exclamation point to go into the wifi settings and turn off “private address”. This will cause the iOS device to prompt you to reconnect.

If your username and password are correct, the device should show as connected.

Connecting an Android Device

Step 1: Select Wi-Fi labelled: **Education Wifi**

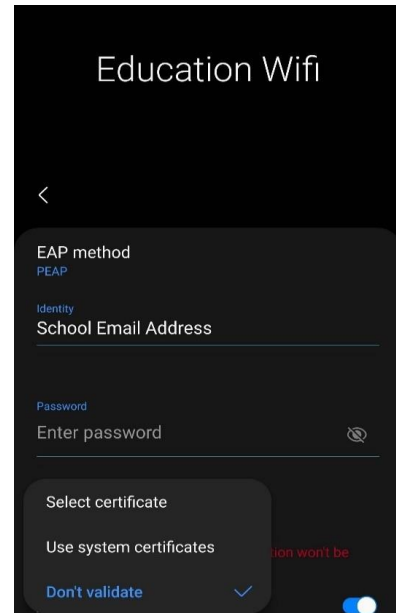

Step 2: The settings pictured to the right are the choices to correctly join.

Depending on your Android version. The option for CA Certificate may appear as two different options.

- **Unspecified.**

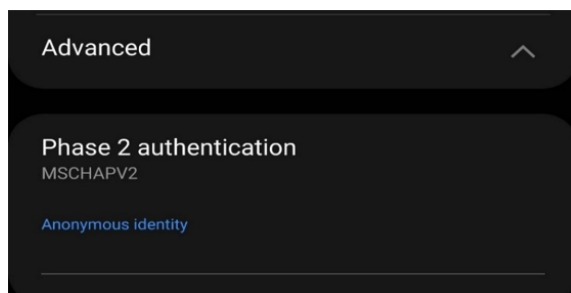

Or

- **Do not validate.**

Step 3: Enter your **work email address** as the username and your work account password. NB: Ignore the field labelled 'Anonymous Identity'

Select "Advanced" and choose MSCHAPv2 if not already selected.

If your username and password are correct, the device should show as connected.
